
TITLE 329 SOLID WASTE MANAGEMENT DIVISION**SECOND NOTICE OF COMMENT PERIOD**

LSA Document #13-272

UNDERGROUND STORAGE TANK DELIVERY PROHIBITION**PURPOSE OF NOTICE**

The Indiana Department of Environmental Management (IDEM) has developed draft rule language for amendments to [329 IAC 9-1](#) and [329 IAC 9-4.5](#) concerning the Underground Storage Tank (UST) Delivery Prohibition Program. By this notice, IDEM is soliciting public comment on the draft rule language. IDEM seeks comment on the affected citations listed and any other provisions of Title 329 that may be affected by this rulemaking.

HISTORY

First Notice of Comment Period: June 26, 2013, Indiana Register (DIN: [20130626-IR-329130272FNA](#)).

CITATIONS AFFECTED: [329 IAC 9-1](#); [329 IAC 9-4.5](#).

AUTHORITY: [IC 13-14-8](#); [IC 13-19-3-1](#); [IC 13-23-1-2](#); [IC 13-23-1-4](#).

SUBJECT MATTER AND BASIC PURPOSE OF RULEMAKING**Basic Purpose and Background**

In 2005, Congress made amendments to include a delivery prohibition provision in the Underground Storage Tank Compliance Act (USTCA). A state that plans to receive funding under Subtitle I of the Solid Waste Disposal Act (SWDA) for UST programs must comply with 42 U.S.C. 6991k, by establishing at a minimum criteria for determining ineligibility, processes for providing notice of ineligibility, the mechanism for identifying an ineligible tank, the process for reclassification, and delineation for rural and remote areas. To further clarify requirements, the United States Environmental Protection Agency (U.S. EPA) published Underground Storage Tank Program Delivery Prohibition Grant Guidelines to States (Grant Guidelines) in August 2006 (EPA-510-R-06-003).

[IC 13-23-1-2](#) and [329 IAC 9](#) require UST owners and operators to install and maintain equipment to prevent corrosion, detect leaks, prevent overfill, prevent spills, and meet other performance and upgrade standards. Owners and operators must also maintain financial responsibility for corrective action and liability to third parties. The current delivery prohibition rules, found at [329 IAC 9-4.5](#), allow IDEM to place a UST that is noncompliant under UST delivery prohibition. A UST under delivery prohibition is prevented from accepting further delivery or deposit of regulated substances into the tank until the tank is brought back into compliance. Delivery prohibition has an economic impact. The degree of the impact will depend upon factors such as the following:

- Whether the UST is the only source of the regulated substance or one of several sources as part of a large facility.
- The number of USTs under delivery prohibition at the site.
- The function and purpose of the UST.
- The amount of time the UST is in noncompliance.
- What is needed to come into compliance, such as registrations of the UST, payment of tank fees, new or upgraded equipment, or testing of equipment.

If one UST is at a large facility, not used daily, and is noncompliant for a short period of time, the impact of delivery prohibition will be very small. If the UST is the only source of the regulated substance at the facility, is used daily, and is left in noncompliance for a long period of time, the impact of delivery prohibition would likely be larger.

In 2012, the Indiana General Assembly passed legislation found at [IC 13-23-1-2\(c\)\(9\)](#) and [IC 13-23-1-4](#) directing IDEM to adopt rules for a delivery prohibition program to fully implement the requirements of 42 U.S.C. 6991k. [IC 13-23-1-4](#) specifically describes the instances that cause a UST to be ineligible for delivery of a regulated substance. [IC 13-23-1-4\(d\)](#) allows the Commissioner of IDEM to implement the Delivery Prohibition Program, as described in [IC 13-23-1-4](#), prior to the Environmental Rules Board's adoption of rules, until January 1, 2015.

IDEM has developed draft rule language amending the existing [329 IAC 9-4.5](#) UST delivery prohibition rules and associated definitions at [329 IAC 9-1](#). These changes will ensure the rules remain consistent with federal law and guidelines and comport with current Indiana statutes. Further, these changes will protect human health and the environment and provide clear guidelines for those who own or operate a UST. IDEM seeks comment on the affected citations listed and any other provisions of Title 329 that may be affected by this rulemaking.

[IC 13-14-9-4](#) Identification of Restrictions and Requirements Not Imposed under Federal Law

No element of the draft rule imposes either a restriction or a requirement on persons to whom the draft rule

applies that is not imposed under federal law. All elements of the draft rule are required under federal law to maintain state UST program funding through Subtitle I of the SWDA. [IC 13-23-1-4\(b\)\(2\)\(C\)](#) allows the commissioner to prohibit delivery to a UST, after a 30 day opportunity for the owner or operator to take corrective action, if an owner fails to register a UST or pay annual registration fees. Failure to register a UST is not specifically prescribed by 42 U.S.C. 6991k but registration of a UST with the state is the cornerstone of a federally approved state program under the USTCA that receives federal funding (Notification; 42 U.S.C. 6991a.; [329 IAC 9-2-2](#)). In Indiana, failure to pay annual tank fees required under [IC 13-23-12](#) is a failure to maintain financial responsibility as prescribed by 42 U.S.C. 6991 and the Grant Guidelines. A UST owner who relies on the Excess Liability Trust Fund, described in [329 IAC 9-8-11](#), to meet financial responsibility obligations is not eligible to receive reimbursement for corrective action or third party liability costs under [IC 13-23-8-4\(a\)\(2\)](#) if the owner fails to pay tank fees.

Potential Fiscal Impact

Complying with these amendments will not impose any additional fiscal impact than what is currently required under existing federal law and state UST laws and rules. Current state law and rules require UST owners to maintain registration, pay annual registration fees, and implement various techniques to detect, prevent, and correct releases and spills. UST delivery prohibition is a significant deterrent to violations of state law and rules that may result in releases to the environment, but does not impose any further requirements on the regulated community. IDEM does not anticipate any fiscal impact stemming from delivery prohibition to exceed \$500,000.
